Smart Online Marketing on a Budget

Therefore, by focusing on smart strategies, we consequently maximize impact; thus, delivering quality results cost-effectively.

Digital Marketing Demand

No doubt, digital marketing has huge demand; moreover, reports indicate it is growing at 30% annually. Because it is increasing due to affordable smartphones, cheaper mobile data, and widespread use of e-commerce and social media, digital marketing has consequently become a vital growth strategy.

- In addition, traditional methods such as radio and TV are categorized as offline marketing. Although they involve electronic devices, the connection to the Internet is not necessary.
- On the other hand, online marketing, also referred to as Internet marketing or digital advertising, includes SEO, SMO, PPC, and so on. Moreover, it provides instant analytics, targeted campaigns, and global reach.

Additionally, from a global perspective, the world population is estimated at around 8.3 billion, out of which, nearly 6 billion people are projected to be the Internet users by 2026. Consequently, digital platforms have become more relevant than ever for businesses worldwide.

Specifically in India, the current population stands at approximately 1.4 billion. With over 1 billion monthly active Internet users projected by 2026, digital marketing is growing at an estimated rate of 30% per year, making it a crucial brand-building solution not only in India but globally.

Indeed, **India now ranks second only to China.** According to reports by the [Internet and Mobile Association of India \(IMAI\)](#), India is projected to reach around **1.03 billion Internet users by 2026**, while China continues to lead with approximately **1.3 billion users**.
